JinChen

Software Engineer

As a seasoned software engineer, I thrive on delivering optimal solutions for a diverse clientele. With over 2 years of development experience, I've successfully led engineering teams to meet concrete objectives within strict deadlines. My motivated mindset and expertise lie in automating processes to enhance productivity. I am passionate about continuous learning, eagerly embracing new technologies, applying them to both professional and personal software projects, and immersing myself in the world of game development.

Experience

2022 - Current

Emburse | 160 Bloor St E #500, Toronto, ON

Automation Engineer

Collaborated with other engineering teams to deliver an optimized memory script, ensuring efficient resource utilization. Developed the most optimized solutions for various customers, tailoring them to meet unique requirements. Participated in chatbot development initiatives, enhancing user interactions and automating processes. Additionally, contributed to the development of packages to standardize design and style across the company's diverse range of products.
